

Toyota Forklift Part

Toyota Forklift Parts - In the United States, Toyota Materials Handling inc., or TMHU, continues to be the top selling lift truck dealer since 1992. Proudly celebrating more than 40 years of service, the Irvine, California situated company offers a comprehensive line of quality lift trucks. Owing to their reputation of excellence, reliability, and sturdiness, Toyota remains prevalent in this competitive market. Quality is the keystone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S. are built here.

Every one of Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to persistent improvement, and its environmental systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift trucks emit 70 percent less smog forming emissions than the existing centralized EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's success comes from its dedication to manufacture high quality lift vehicles while offering superb client assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." • TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's principal lift truck supplier and is amongst the magazines impressive World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an exceptional company values towards environmental management within Toyota. Toyota's loaded history of environmental protection whilst retaining economic viability cannot be matched by other corporations and certainly no other materials handling producer can thus far rival Toyota. Environmental accountability is a key feature of corporate decision making at Toyota and they are proud to be the first and only manufacturer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet one more reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more elaborate 2010 emission standards. The end creation is a lift vehicle that creates 70 percent less smog forming emissions than the current Federal standards tolerate.

Also starting in 2006, jointly with the Arbor Day Foundation, Toyota added to its commitment to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and community parks that were damaged by fires and other natural causes. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's network of sellers to non-profit organizations and local customers to help sustain communities all over the United States

Toyota's lift vehicles offer improved output, visibility, ergonomics and durability, and most importantly, the industry's leading safety technology. The company's System of Active Stability, also known as "SAS"•, helps decrease the risk of mishaps and accidental injuries, in addition to increasing productivity levels while minimizing the potential for product and equipment damage.

System Active Stability is able to perceive conditions that could lead to lateral instability and potential lateral overturn. When any of these conditions have been detected, the SAS will immediately engage the Swing Lock Cylinder to re-stabilize the rear axle. This adjusts the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding stability.

SAS was first launched to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS have been built-in to the majority of Toyota's internal combustion machines. It is standard gear on the latest 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with mandatory operator training, overturn fatalities across all brands have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% drop in industry wide collisions, loss of control, falls and tip overs from a lift vehicle for the same period.

Toyota's uncompromising values extend far beyond the machinery itself. The company believes in providing widespread Operator Safety Training programs to help customers satisfy and exceed OSHA standard 1910.178. Training services, videos and an assortment of resources, covering a wide scope of matters-from personal safety, to OSHA regulations, to surface and cargo conditions, are available through the seller network.

Toyota has sustained a permanent existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift truck. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in America now are built in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of land.

Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service parts, with the total investment exceeding \$113 million dollars.

The new NCC was designed to operate for TMHU buyers and sellers. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and finally a instruction center.

The NCC embodies Toyota's dedication to providing top-notch client service. TMHU's 68 certified Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations throughout the U.S, provide the most complete and inclusive consumer service and support in the industry. The company's new and Licensed Used lift vehicles, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to ensure total client satisfaction.
